## Hiring Team

Forbes Digital Marketing Inc. (Forbes Advisor)

Remote - India / Mumbai

## Subject: Application for Data Scientist (Growth & Decision Science)

Dear Hiring Team,

I am writing to express my strong interest in the **Data Scientist** position at Forbes Advisor. With a Bachelor of Data Science from the University of Mumbai and hands-on industry experience at the intersection of performance marketing, product optimization, and predictive modeling, I am excited to help Forbes Advisor drive user acquisition, lifetime value (LTV), and monetization.

Currently, as a **Data and Growth Analyst at Heawen Property**, I clean, transform, and model multi-source CRM, sales, and ad data using SQL and Python. My work directly shapes growth decisions: I set up and optimized lead-generation campaigns across Google and Meta Ads, tracked conversion funnels, and engineered automated workflows using Zapier and Meta APIs, reducing manual reporting overhead by 40%. This experience has given me a strong understanding of cohort analysis, media attribution, and the commercial drivers behind digital media platforms.

The requirements in your job description map directly to my core projects and skills:

- **Predictive Modeling:** Built an end-to-end real estate valuation pipeline utilizing a Random Forest regressor explaining 95.5% of price variance, showing my ability to deploy functional regression models.
- **Affiliate & Lead-Gen Experience:** Shipped the express lead acquisition backend and landing pages for *Runwal Meadows*, giving me a strong background in customer funnels.
- **NLP & Generative AI:** Built *PropBot*, a RAG agent utilizing LangChain, ChromaDB, and Gemini API, directly aligning with your nice-to-have requirements in embeddings and agentic search.

I am highly drawn to Forbes Advisor because of your reputation for combining data-driven content with user-first design to empower consumers. I bring the 'builder' mindset your team values—someone who designs scalable, reusable ML pipelines rather than one-off reporting scripts. I am eager to apply my data science background and passion for marketing analytics to your team.

Thank you for your time and consideration. I look forward to discussing how my experience can support the growth initiatives at Forbes Advisor.

Sincerely,

**Yash Patil**
